ATCO NOISE MANAGEMENT EXPANDS WITH NEW HOUSTON OFFICE Texas Operation Brings Noise Reduction Consulting Services Closer to Clients

CALGARY, Alberta -- ATCO Noise Management is opening a Houston office of its ATCO Acoustical Consultants business unit to better provide expert industrial noise consulting services in the Southwestern United States.

"ATCO Noise Management has always done a lot of consulting work in the Southwest, and this new office brings our expertise much closer, ensuring more immediate response to clients in Houston, the State of Texas, and across the South," said Boris Rassin, President of ATCO Noise Management. "With our experience in various industries, our on-going R&D, the experience of our staff, and considerable corporate resources we see strong growth potential in the region."

The new office will be located at Suite 105, 800 Wilcrest Drive in Westchase near the Energy Corridor. The office will be led by Andrew Cummins, a senior business development professional from Houston, formerly with Industrial Information Resources and Chris Giesbrecht, a senior acoustical engineer recently transferred from ATCO Noise Management's corporate headquarters in Calgary.

ATCO Acoustical Consultants is one of the largest in the field of industrial noise in North America. With Canadian offices in Calgary, Ottawa, and Cambridge and US offices near Boston and now Houston, the ATCO Acoustical Consultants unit is constantly striving to better serve the needs of existing and new clients, leveraging its parent company's expertise in design and construction of noise reduction projects into a practical advice. The business unit is staffed with eleven experienced acoustical engineers and several project administrators, who work closely with members of the mechanical and structural engineering departments of ATCO Noise Management. ATCO Noise Management formed the business unit to focus on growing industry needs across North America for proven consulting expertise in noise management and reduction.

Latin American clients will continue to be serviced from the company's office in Curitiba, Brazil.

ATCO Noise Management, part of the ATCO Group of Companies, provides equipment enclosures, gas turbine silencers, stacks and anti-icing systems, noise consulting and acoustical buildings for energy projects and other industrial facilities. ATCO Noise Management has been constructing acoustical buildings around the world since 1991, while company's Higgott-Kane Division has been providing turbine exhaust silencing since 1979. From 1998 onward, the company has also operated without a single loss time accident on hundreds of construction sites world-wide.
