Alberta Continues to Pioneer More Stringent Noise Regulations

Revised edition of the Alberta Energy and Utilities Board (EUB) Directive 038: Noise Control brought into effect.

On February 16th, 2007, the EUB announced the revised edition of Directive 038: Noise Control. This edition of Directive 038 replaced all previous editions and Guide 38: Noise Control Directive User Guide and Interim Directive ID 99-08.

As a stakeholder in the development of the revised Directive, ATCO Noise Management is uniquely qualified to answer any questions you may have.

The revised Directive addresses:

- Additional low frequency criteria;
- New guidelines for noise measurement methodology, instrumentation, accreditation, and modeling;
- Mandatory requirement to meet 40 dBA at 1.5 km (1 mile) from the facility or at the nearest sensitive receiver (NSR).

For more information on how these new regulations affect your industrial facility, please contact:
